## fabrics & textiles

With a passion for timeless design, we simply love creating stylish spaces for projects, big and small. With interest and innovation we can help realise the potential of your space, inside and out, using intelligent concepts, practical design and of course beautifully crafted furniture made from responsibly sourced materials, with ethical production and recycling.

Whatever the project environment we work with materials of the best quality, including high-performing textiles, yarns and timbers that are resistant to water, sunlight and extreme temperatures which allows us to advise on all requirements. Want to specify the cushion upholstery? No problem. We make cushions to order using either the clients choice of fabric or one of our many own. Just let us know on enquiry and we will advise on textiles, suitability and safety.
